

DI-924MB

Multi-Channel Temperature Control Modules

Thermocouple or Millivolt Input Limit Alarms or Discrete Outputs

Models

DI-924MB: 4 input channels

Input

Four input channels:

Thermocouple (types J, K, T, R, S, E, B, N), $\pm 100\text{mV DC}$

Output

Four output channels:

Open-drain MOSFETs (1A DC loads)
0 to 35V DC

Network Communication

Modbus-RTU high-speed RS-485

Power Requirement

10 to 36V DC, 24V AC

Approvals

CE marked, UL, cUL listed

Class I; Division 2; Groups A, B, C, D.

This signal conditioner is a four-channel analog input module with four discrete outputs. It filters and linearizes thermocouple inputs while providing isolation between input, output, power, and network circuits. Cold junction compensation and upscale/downscale sensor break detection are standard. AC and DC power sources are supported with nonpolarized, diode-coupled terminals.

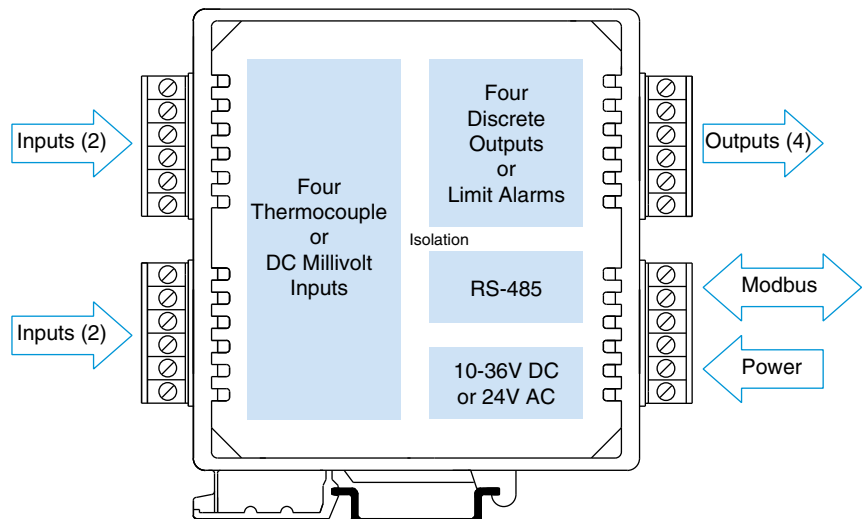

The programmable inputs accommodate eight thermocouple types plus wide-range millivolt signals. Flexible discrete outputs operate as alarms or on/off controllers. As limit alarms, each discrete output can be configured with high and/or low setpoints exclusively tied to an analog input channel. Alarm trips function without host communication enabling low-cost stand-alone alarms as well as local backup for the primary control system. Otherwise, on/off control is based on commands issued by the host system.

Combining flexible transmitter functions, mixed signal I/O, alarm support, and a network interface in a single package, makes this instrument extremely powerful. Multi-channel design adds cost-efficiency and allows high-density mounting. Plus, safe, rugged construction makes these modules reliable for use in both control room and distributed field I/O applications. Custom module configurations are also possible (consult factory for details).

Features

- Standard Modbus RTU protocol with high-speed RS-485 communication (up to 115K bps).
- Self-calibration lowers maintenance costs by reducing periodic manual calibration checks.
- 16-bit sigma-delta A/D yields 0.1°C resolution and 0.5°C measurement accuracy.
- Watchdog timers provide a configurable failsafe output state for use when host I/O communication is lost.
- Thermocouple linearization and sensor break detection ensure reliable measurements.
- Four-way isolation eliminates potential ground loops between power, input, output and network circuitry.
- Four discrete outputs enable local temperature limit alarms or host-controlled on/off switching.
- Self-diagnostics monitor microcontroller activity to detect operational failures (lock-up) and execute a reset to restore communication.
- Heavy-duty 1A solid-state relays provide dependable on/off control of industrial devices.

Thermocouple/Millivolt Input Module

Performance

General Analog Output

Resolution

±100mV DC input: 0.1%.

Thermocouple input: 0.1°C (0.18°F).

Ambient Temperature Effect

Better than ±0.005% of input span per °C, or ±1.0uV/°C, whichever is greater.

Noise Rejection

Normal mode: 40dB @ 60Hz, typical.

Common mode: 140dB @ 60Hz, typical.

Input Filter Bandwidth

-3dB at 3Hz, typical.

Input Conversion Rate

90ms per channel.

Thermocouple Input

Thermocouple Input Ranges

Thermocouple type user-configured. Type selected applies to all channels. Signal linearization, cold-junction compensation, and open circuit or lead break detection are included.

| TC | °C Range (°F Range) | Accuracy |
|----|---------------------------------|----------|
| J | -210 to 760°C (-346 to 1400°F) | ±0.5°C |
| K | -200 to 1372°C (-328 to 2502°F) | ±0.5°C |
| T | -260 to 400°C (-436 to 752°F) | ±0.5°C |
| R | -50 to 1768°C (-58 to 3214°F) | ±1.0°C |
| S | -50 to 1768°C (-58 to 3214°F) | ±1.0°C |
| E | -200 to 1000°C (-328 to 1832°F) | ±0.5°C |
| B | 260 to 1820°C (500 to 3308°F) | ±1.0°C |
| N | -230 to 1300°C (-382 to 2372°F) | ±1.0°C |

Note: Accuracy is given with CJC switched off. Relative inaccuracy with CJC enabled may increase by ±0.5°C.

Thermocouple Break Detection

TC sensor failure can be configured for either upscale or downscale. Selection applies to all channels.

DC Millivolt Input

Millivolt Input Ranges
±100mV DC.

Millivolt Input Accuracy

±0.1% of input range.

Discrete Output

Output Type

Four independent open drain MOSFET switches with a common return that operate as low-side switches.

Output Voltage Range

0 to 35V DC, 1A DC maximum for each output. External voltage source required.

Output ON Resistance

0.15 ohms maximum.

Operation

Digital outputs are set to their OFF state following a software or power-on reset. Outputs can optionally be set to user-defined states following a watchdog timeout. Watchdog timeout output control takes precedence over limit alarm control. Alarm control takes precedence over host control.

Output Response Time

4.1ms typical, from receipt of command to gate transition of the output MOSFET.

Communication

Supported Modbus Commands

The command/response protocol for communicating with this module adheres to the Modbus/RTU standard for the following Modbus Functions.

- Read Coil
- Read Holding Registers
- Read Input Registers
- Force Single Coil
- Preset Single Register
- Force Multiple Coils
- Preset Multiple Registers
- Report Slave ID
- Reset Slave

LED Indicators

LEDs indicate power, status, and discrete level/alarm.

Power and Isolation

Power Requirements

10 to 36V DC, 22 to 26V AC.

Supply Current

| Supply | Current Draw |
|--------|------------------|
| 10V DC | 100mA maximum |
| 24V DC | 45mA maximum |
| 24V AC | 85mA rms maximum |

Isolation

1500V AC for 60 seconds or 250V AC continuous. 4-way isolation between input, network, power and discrete I/O circuits. Inputs are isolated channel-to-channel for common mode voltage to ±5V DC.

Software Interface Package

DATAQ Instruments, Inc., provides a full set of tools to help you get your modules set up and ready to run in an easy-to-order package that includes the Windows Configuration Software, an RS-232 to RS-485 Serial Port Converter, and an RS-485 Signal Cable.

The Software Interface Package Includes the following:

- Configuration Software for Windows (95, 98, ME, NT, 2000, XP) on CD-ROM.
- Non-isolated RS-232 to RS-485 Serial Port Converter, DB-9S to DB-9F.
- RS-485 to 3-wire Cable Converter, DB-9M to 3 x 12 AWG RS-485 Cable, 8 ft.

RS-232 to RS-485 Serial Port Converter

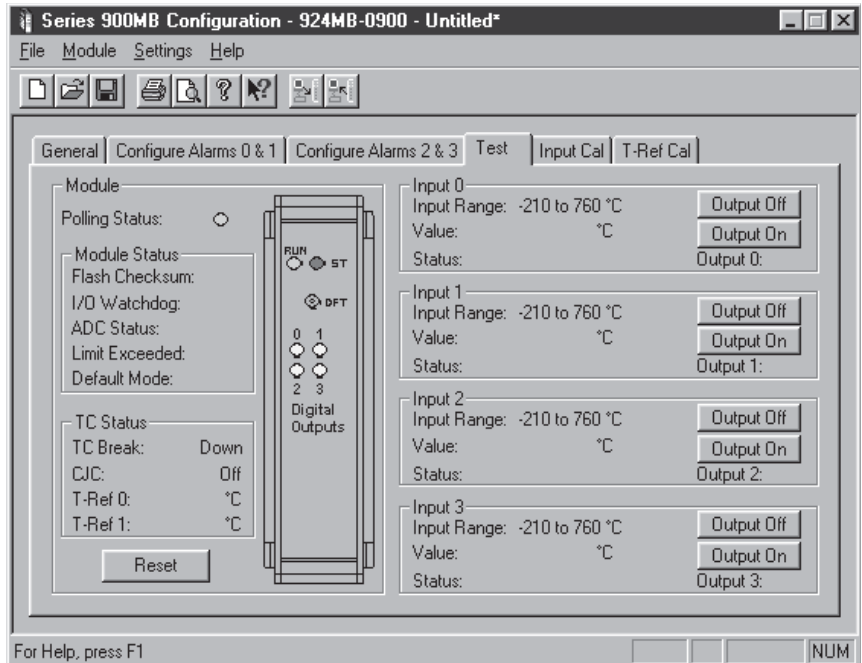

This Serial Port Converter is a non-isolated, port-powered, RS232-to-RS485 signal converter. Although the converter receives its power from the RS232 data and handshake lines, no handshaking lines are required to control the converter's RS485 driver. It plugs directly into the DB-9 male RS232 serial port connector on the back of most personal computers via the cable provided in the interface package.

Windows Configuration Software

The Windows Configuration Software provides an easy way to configure your module to whatever your application may be. The configuration software provides the following capabilities:

- Change Host and Slave communication settings (Baud Rate, COM Port, address, et al.
- Monitor the discrete I/O signal states and watchdog status allowing discrete outputs to be turned on/off.
- Allows a configuration to be uploaded or downloaded to/from the module via the RS 485 interface.
- Provides controls to reset the module.
- Reads the contents of the Module Status Register.
- Allows optional user documentation to be saved with a module file.
- Allows a module's complete configuration to be printed in an easy-to-read, single-page format, including user documentation.

Test page (right) simplifies diagnostics with a live visual display of the module's input and output values.

Software Support

DI-900MB series products are designed for Modbus RTU compatibility. Modbus is a communication protocol developed by MODICON, Inc. in 1979. In the years since its release, Modbus has evolved into a truly open standard and has become the most widely used networking communication protocol in the industrial automation field. Virtually all SCADA and HMI application software packages can easily fold DI-900MB devices into any new or existing data acquisition and control environment. DI-900MB products support the RTU (Remote Terminal Unit) Modbus extension, which is a binary protocol providing enhanced performance. The following is a brief list of Human Machine Interface (HMI) software vendors who support the Modbus RTU protocol, and therefore support DI-900MB Series products. The space available does not allow an exhaustive list.

Citect

Isolated Signal Converter

This unit provides an isolated interface between the host PC's RS-232 port and RS-485 Modbus network devices. Signal conversion is bidirectional with operation that is transparent to all devices. The RS-485 network supports up to 32 devices (including the converter) across 4000 foot distances. Installation of additional network devices or extending the distance requires an Isolated Network Repeater (Model Numbers 100977 or 100978). Power cord included. Signal Cable (Model 100976) connects the PC's RS-232 Port to the Isolated Signal Converter.

Specifications

Baud Rates

Switch-selectable from 300 to 38.4K baud.

Duplex

Half duplex only.

Network Termination Resistors

Two terminal blocks and 120 ohm resistors provided to terminate both ends of the RS-485 network.

Wiring Connectors

Terminal blocks with screw clamps for 14-26AWG

Operating Temperature Range

-25 to 60°C (-13 to 140°F)

Isolation

Withstands 1500V AC surge for 60 seconds (250V AC or 354V DC continuous).

Model Numbers

100974 (115V AC Power) (discontinued)
 100975 (230V AC Power) (discontinued)
 100976 (8ft. long DB-9 to 3-wire RS-232 Cable)

System Connection

Isolated Network Repeater

This unit isolates and boosts RS-485 signals to extend communication distances or increase the number of devices on the network. Each Repeater permits the addition of a network branch with up to 32 devices (including the Network Repeater) and will transmit RS-485 signals another 4000 feet. Operation is transparent to all devices and no handshaking is required. Two terminal blocks are provided for 120 ohm resistors to terminate both ends of the network branch.

Specifications

Baud Rates

Switch-selectable from 300 to 38.4K baud.

Duplex

Half duplex only.

Network Termination Resistors

Two terminal blocks and 120 ohm resistors provided to terminate both ends of the RS-485 network.

RS-485 Wiring Connectors

Terminal blocks with screw clamps for 14-26AWG.

Power Wiring Connections

Terminal block with screw clamps for 12-18AWG.

Operating Temperature Range

-25 to 60°C (-13 to 140°F).

Isolation

Withstands 1500V AC surge for 60 seconds (250V AC or 354V DC continuous).

Model Numbers

- 100977 (115V AC Power)
- 100978 (230V AC Power)
- 100979 (115V AC Power Cord)

Extending the Network

Universal 50W Power Supply

This Universal 50W Power Supply is the ideal power source to drive your network.

Input Power Requirement
 Universal power
 85 to 264V AC,
 105 to 370V DC

Output
 24V DC, 2.1A (50W)

DIN-Rail Mounting

For your convenience, DATAQ Instruments, Inc., offers a rack mount kit to simplify your system installation. This 19-inch kit provides a clean solution for mounting your I/O modules and a power supply. Holds up to 16 DI-900MB modules.

Model Number
100971

USB to RS-232 Adapter

Convert signals from RS-232 to USB with this convenient adapter. For use with all DI-900MB Series modules.

Dimensions
 Length: 3.15 in (8.0 cm)
 Height: 0.80 in (2.03 cm)
 Width: 1.75 in (4.44 cm)
 Weight: 1.6 oz (45.36 g)

Model Number
100970

General Module Specifications

Communication Interface

Network Communication

Modbus-RTU protocol, RS485 (3-Wire). Standard Protocol implementation as defined under "Modicon Modbus Reference Guide" PI-MBUS-300 Rev. J. Reference: <http://public.modicon.com>. Search on: PI-MBUS-300 for technical publication.

Baud Rate

2400, 4800, 9600, 14.4k, 19.2k, 28.8k, 38.4k, 57.6k, 76.8k, or 115.2k baud. Default 9600 baud.

Module Addressing

0 to 247, selectable. Default address 247.

Network Distance

4000 feet without network repeater.

Nodes

Supports up to 32 modules without the use of a network repeater.

Parity

Odd, even, or none. Default setting none.

Stop Bits

One with parity, one or two with no parity. Default setting is two stop bits with no parity.

Watchdog Timer (Hardware)

A hardware watchdog timer is built into each module to perform a reset if the microcontroller fails to return from an operation in a timely manner or "locks up."

Watchdog Timer (Network Communication)

All modules have a communication watchdog timer function. The watchdog timer is configurable for timeout periods of up to 18 hours. This timer function monitors I/O communications with the host controller. In the event of lost communications, output ports optionally reset to a user-defined state or level. The watchdog timer restarts with a read/write to an I/O channel.

Environmental

Ambient Temperature

Operation:

-25°C to +70°C (-13°F to +158°F).

Storage:

-40°C to +85°C (-40°F to +185°F).

Relative Humidity

5 to 95% non-condensing.

Radiated Field Interference Immunity (RFI)

Complies with EN61000-4-3 Level 2 and EN50082-1 (3V/M, 80 to 1000MHz AM and 900MHz keyed).

Electrical Fast Transient Immunity (EFT)

EN61000-4-4 Level 1 and EN50082-1 (0.5KV power, signal lines).

Electrostatic Discharge (ESD) Immunity

EN61000-4-2 Level 3 and EN50082-1 (8KV/4KV air/direct discharge).

Surge Immunity

EN61000-4-5 (0.5KV) and EN50082-1.

Radiated Emissions

Meets EN50081-1 for Class B equipment.

Approvals

CE marked. UL listed for US and Canada. Class I; Division 2; Groups A, B, C, D.

Enclosure/Physical

Enclosure

Self-extinguishing NYLON type 6.6 polyamide thermoplastic UL94 V-2, color beige; general purpose NEMA Type 1 enclosure.

Connectors (Removable Terminal Blocks)

Wire Range: AWG #12-24, stranded or solid copper.

Dimensions

1.05W x 4.68H x 4.35D inches
26.7W x 118.9H x 110.5D mm.

DIN Rail Mounting

DIN rail mount, Type EN50022; "T" rail (35mm).

Shipping Weight

1 pound (0.45 Kg) packed.

Ordering Information

| Description | Order Number |
|---|--------------|
| 4-channel thermocouple or millivolt input | DI-924MB |
| DI-900MB Configuration Kit (includes Configuration Software, RS-232/485 non-isolated converter, and RS-485 to 3-wire cable, 8ft.) | 100969 |
| RS-232 to USB Adaptor | 100970 |
| 19" rack mount kit with DIN rail | 100971 |
| RS-232 cable for 100974 and 100975 products (DB-9 to three-wire) | 100976 |
| Isolated Network Repeater, 115 VAC Power | 100977 |
| Isolated Network Repeater, 230 VAC Power | 100978 |
| 115V AC Power Cord for 100977 and 100978 products | 100979 |
| 50W universal power supply; 24V DC @ 2.1A (50W) output; 85-264V AC or 105-370V DC input | 100980 |
