

DI-148, DI-158, DI-710, or DI-715B Installation Quits with “Invalid property value” error

Symptoms

During installation “Invalid property value” error pops up and installation program is terminated (Windows 98 error could instead read “Unexpected error.” Actual error message may vary.).

Cause

MSCOMM32.ocx file is outdated. File should be dated 6/24/98 or later.

Resolution

Find and replace **MSCOMM32.ocx** file. MSCOMM32.ocx is found in the Windows directory in the system32 folder (C:\Windows\system32). A more up-to-date version can be downloaded off the web at <http://www.dataq.com/support/downloads/mscomm32dotocx.zip> or on *The WinDaq Resource* CD-ROM (dated October 2004 or later) in the folder Dataq\support\downloads\mscomm32dotocx.zip.

The information in this article applies to:

DI-148, DI-158, DI-710, and DI-715B Installation all Windows OS.
